

MyEstate Woven Strand Bamboo Board - Maintenance

Summary

MyEstate Woven Strand Bamboo Board is supplied pre oiled to the customers required colour. Along with defining the colour, the oil acts as an optional protective layer that keeps the board looking like new.

Maintenance

1. To maintain the Woven Strand Bamboo Board appearance, we recommend cleaning then applying a thin even layer of oil every 2 years.
2. Failing to re-apply oil will not affect the quality or lifespan of the Bamboo, the oil is only required to maintain the original colour. Without reapplying oil, the board will fade to a silver/grey natural colour over time.
3. As our Woven Strand Bamboo Board is suitable for both Indoor or Outdoor use, the board can be cleaned with gentle outdoor timber cleaners and soft pressure washing.
4. We recommend WOCA Exterior Wood Oil
